

# INVACARE Action<sup>5</sup> and Action<sup>5</sup> Rigid

Action<sup>5</sup> with folding frame

The Action<sup>5</sup> is designed specifically for users with an active lifestyle. It offers an affordable chair with good drive performance that can easily be folded for handling, storage or transportation.

The lightweight folding frame features step-less adjustability allowing very fine adjustments to be made. The patented “H-shaped” horizontal folding mechanism provides improved stability and the self-locking function ensures a secure seat position.

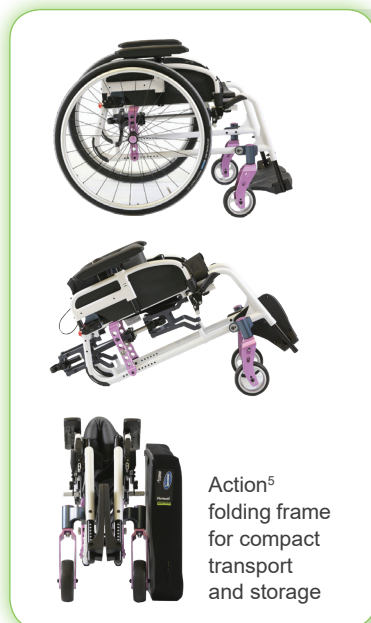

Certain adjustments are even possible while the user remains seated.

The Rigid frame option makes for an even more robust, energy efficient lightweight wheelchair. Highly configurable, it offers the choice of fixed or swing away front frame for easier transfers or transportation.

Action<sup>5</sup> Rigid

Crash Test Approved

Action<sup>5</sup> folding frame for compact transport and storage

Personalise with a choice of frame and accent colours

Highly configurable, with a selection of armrests, legrests, push handles and accessories

Backrest angle adjustments while person in chair
