

# Aquatec Ocean Ergo | XL

The new Ergo versions of the Aquatec Ocean shower commodes have been designed to make personal care activities easier for user and carer. User comfort, independence and dignity are key considerations during personal care and the Aquatec Ergo family of commodes encourages a more upright, stable seating position to promote user independence and overall comfort.

The enhanced stability and smaller footprint of the wheelbase makes the commode more easily manoeuvrable in small spaces and allows for a better fit over standard toilets.

The modular design allows the chairs to be adapted to suit a wide range of user needs by simply adjusting or adding the easy to fit, off-the-

shelf accessories.

Stainless steel frame

Enhanced stability for additional safety & reassurance

Ergonomic seat encourages a more upright seating

Optimised wheel base for manoeuvrability in small spaces

Extensive range of positioning, safety, toileting and seating accessories

Available in transit and self-propel

All Ocean Ergo models offer multiple adjustments to accommodate a wide range of user sizes
