

# MERCURY ADVANCE MATTRESS

## OPERATING GUIDELINES

### 1. YOUR MATTRESS

### 2. THE PUMP

### 3. USING THE MERCURY ADVANCE

The Mercury Advance Mattress is an **Alternating Air | Foam Mattress Hybrid**.

The modern castellated foam technology provides superb pressure relieving properties when used as a **static** foam mattress.

If clinically required, the mattress can be “stepped up” to a **dynamic** alternating air mattress by attaching the pump which then inflates the air cells for additional offload and pressure relief.

The firmer foam of the side edges provides additional support, making self-transfer much easier.
