

CARETEK Profile Ward | ICU Bed

The Caretek C-4DL Profile Acute Care Ward Bed has been built to comply with International Standard IEC 60601-2-52.

It comes standard with automatic battery back-up included and a Linak electronic drive system. The control panel has the capacity to temporarily restrict patient access to the control panel.

It offers great features like one-button chair positioning and under bed soft lighting. The back rest automatically retracts during profiling to reduce abdominal squeeze and can be rapidly levelled using the manual CPR quick-release.

Safe Working Load - 250kg

Linak electronic drive system

Bed extension

Built-in linen rack

ABS plastic deck panels
- easily removable for cleaning and servicing

Drainage bag rail and hooks - both sides of bed
