

# RotoBed®

The RotoBed® Free is the perfect solution for people who struggle to get in and out of bed. The intuitive remote control requires just a single button press to transition between sleep position and chair position. The RotoBed also has full profiling functions allowing you to adjust the backrest, leg rest and overall bed height. Once elevated to chair position, the bed rotates perpendicularly towards the room to

allow exiting or transfer. You can even set and store your favourite settings for exit height and backrest inclination so that the exit position can be optimised for each individual user.

Includes a **SafeSleep** 4-layer specialised mattress custom made for Rotobed

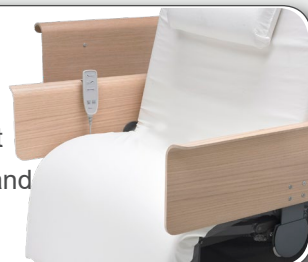

**Cotton Sateen Sheet Sets** are available with both main mattress and foot part

**Short Metal Bedrail** fits head end to provide support with transfers in bed

**Long Laminate Bedrail** provides excellent support when getting in and out of bed

**Round Table Top** made of oak laminate  
30cm diameter  
Height adjustable and swivels

**Lifting Pole** with handle. Can be placed either left or right side of bed - fits into built-in holders on bed
