

STERRI-MATT® Gienie Clinical

Gienie Clinical is a “Press and Leave” solution for health hygiene management. It is targeted specifically for use in healthcare environments where infections are known to commonly occur such as hospitals, doctors’ surgeries, dentists, ambulances and care/nursing homes.

The unique, powerful biocide formula is non-toxic and non-corrosive and allows everything in the room to be decontaminated insitu with no need to clean surfaces or launder curtains post treatment.

Simply place the canister in the area to be treated, depress the release valve and then leave the room

while the whole area is safely and easily decontaminated in only 60 minutes.
