

Breezy BasiX²

The Breezy BasiX² features adjustability and rigidity with a modern, clean look. This lightweight, folding standard wheelchair now includes recent improvements such as greater seat depth adjustment, a tension adjustable backrest and a more robust castor attachment. The ultra lightweight frame was designed for personalised function and comfort. The adjustable seat height allows for foot propulsion if necessary with a range of add-on accessories to further customise the chair to the user's unique requirements.

The flip-back armrests make transfers much easier and the quick-release rear wheels are easily removed for transport or storage. The wheel locks are also easily accessed at the front of the frame. The push handles can be raised or lowered to suit the height of the person pushing the wheelchair and the footplate angle can be adjusted to ensure user comfort.

- Seat height and depth adjustability
- Flip back armrests for easier transfers
- Height adjustable push handles
- Angle adjustable footplate
- Quick-release rear wheels with wheel locks
- Foldable chair frame
- 4 seat width options
- Swing away and adjustable anti-tippers
- Crash-tested and transport approved to ISO 7176-19

The backrest has convenient Velcro fastening tension adjustable straps which allows for adjustment from 41cm - 46cm
