

# BRODA Synthesis Transporter

The Synthesis Transport Chair is ideal for safely and securely transporting individuals to appointments or outings without the need to transfer them from their chair.

It comes with the unique Broda Comfort Tension Seating for pressure redistribution and air flow which results in increased sitting comfort and support.

The Synthesis transporter is ideal for individuals requiring moderate to advanced levels of nursing care and who suffer from severe agitation or involuntary movement.

The need for fewer transfers results in better falls prevention and safe patient handling, as well as increasing the overall comfort for the individual & caregiver.
