

Stainless Steel Carts | Trolleys

HospEquip stainless steel trolleys and linen skips are made from 304R Grade stainless steel. The square tube frame is “fill welded” so that there are no gaps and no caps ensuring the highest possible standards for infection control.

These durable stainless steel products are easy to clean and allow for effective sterilisation.

Trolleys with drawers utilise soft-close drawer runners and double extension roller bearing slides. The castors are highly manoeuvrable and most trolleys and linen skips incorporate two lockable castors for extra stability making these versatile and easily accessible.

The range includes a selection of single and double linen skips. (triple also available by request.)
Options include with or without lid.
Lids are operated using a gas assist foot pedal.
Large enough to transport more sheets and bedding at one time maximising efficiency.
OH&S version has an elevated platform and front opening.

Linen Skips (single double)	Equipment Trolley	Dressing Trolley
40cm 80cm 120cm (W)	49cm 60cm 75cm (W)	49cm 60cm 75cm (W)
