

INVACARE Portable Ramps

The Invacare Portable Ramps uniquely combine unidirectional glass fibre and carbon fibre materials to create a lightweight ramp that is extremely strong, requires no assembly and is suitable for a wide range of uses.

The portable ramps are available in 4 different models, each available in a choice of sizes. The lightweight **PERSONAL** ramps allow easier access in and around the home or workplace eg: ideal for climbing kerbs or similar objects. The **MULTIPURPOSE** ramps are longer and wider, making them better suited to commercial and travel situations, particularly useful outdoors. Both these ranges come with a convenient carry bag. The **SENIOR** range of ramps are available in 10 sizes to cope with obstacles up to 87cm in height. The **EDGE BARRIER LIMITER (EBL)** ramps offer the added security of edge barriers, particularly suited to providing instant access to public transport or buildings where permanent ramps are impractical.

Portable - compact units for easy storage and transport

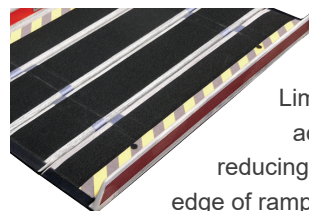

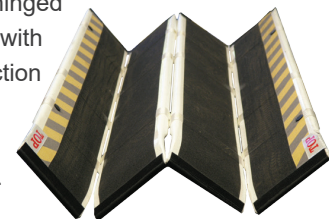

Lightweight but strong - made from unique unidirectional glass and carbon fibre materials.

Compact - multi-panelled design concertina folds for narrower folded width.

Safe - non-slip surface clearly marked and with grip tape. Portable ramps fitted with pad at top and base.

Strong - tested to AS/NZ standards up to 300kg*
(*tested and valid up to 4° incline)

Multi-panel, hinged system folds with concertina action to create a single compact unit.

Edge Barrier Limiter (EBL) offers additional security reducing risk of riding off edge of ramp, especially over longer distance ramps.
