

ORKA Shower Trolley

The Orka shower trolley is manufactured from powder coated sturdy galvanised steel to ensure it can withstand the demands of regular wet area exposure. The top end of the stretcher has gas spring assisted incline up to 5° to prevent pooling around the head and to facilitate drainage through the integrated mattress drain (which includes a 100cm flexible hose). The Orka comes in a hydraulic or electric height adjustment option and includes foldable side rails.

The one piece water resistant vinyl covered shower mattress has 27cm high sides and a semi-cylindrical head pillow for added comfort. The 15cm castors offer an easy steering system which allows you to lock the front left castor in the direction of steering.

- Central Braking
- Directional castor lock - easy steering system
- Hydraulic or Electric Height Adjustment
- 5° gas assisted head end tilt
- Foldable side rails
- One piece water resistant vinyl covered stretcher top
