PATIENT HANDLING HOISTS & SLINGS

INVACARE® Birdie EVO Compact

The Birdie EVO Compact hoist folds easily without needing to use tools, making it easy to transport and convenient to store when space is limited. The compact base makes moving it through narrow doorways simple, while the curved design of the legs allows easy access to comfort chairs and power wheelchairs. As a result, the Birdie Compact is a popular choice for use at home or in aged care facilities.

The Birdie EVO Compact includes all the new improved features of the EVO range, including the new user-friendly hooks, Smartlock™ quick release spreader bar attachment and ergonomic push handle.

The improved curved spreader bar and curved boom design, makes it easier to maintain eye contact with the patient while transferring. With the choice of spreader bars and a full sling range, you are ensured flexibility to suit every individual's needs.

- Compact and easily manoeuvrable
- Tool-less folding for compact storage
- Ergonomic push bar and 100mm castors for easy moving
- Slow'R dampener to reduce rocking
- Smartlock™ Quick release attachment system
- Includes 2-point spreader bar
- Detachable battery pack
- New user-friendly hook design

OPTIONAL ACCESSORIES

4 point spreader bar

Lever for leg spreader

Full range of slings

INVACARE® Birdie EVO (& XPLUS) Hoist

The Birdie EVO hoist is based on the original Birdie lifter but incorporates new features and improvements. The popular choice for nursing or care home environments, it allows for maximum space, even when the lifter is in its highest position, enabling a comfortable lift and transfer for the user. The user can be easily rotated 360° while being lifted, making moving and transferring between a bed, chair or wheelchair much easier. The Birdie is even capable of lifting a patient from the floor.

The leg width is electrically or mechanically adjustable, with a minimum width of 64cm and a maximum spread up to 102cm. The curved design of the legs allow for easy movement around comfort chairs or power wheelchairs. The Birdie EVO is easily folded without needing to use tools, thereby taking up minimal space & making storage & transport easier.

Maximum space for user during lift - can lift from floor

Tool-less folding for compact storage

Electric leg adjustment

Smartlock quick release attachment system

Includes 2-point spreader bar

Detachable battery pack

Improved ergonomic hook design for easier sling attachment

Optional 4-point spreader bar

The Smartlock™ quick release/connection mechanism provides simple and secure locking

The Slow'R dampener integrated into the boom absorbs rocking motion

EVO XPLUS	64cm	128cm	102cm	41.5 - 166cm	11cm	41kg		210kg

Novis LiftAid 180 Hoist

The LiftAid 180 is a lightweight, mobile lifter that is easy to use and allows lifting and transferring from floor, bed or chair. The soft start/stop function and low lifting height provides optimum comfort and safety for both patient and carer.

The upright mast with angled boom has three height settings so it can be set to best match environmental and lifting needs. The U-shaped base is electrically operated while the wide flanged front leg opening offers improved stability and easier access around furniture. The mast can also be removed from the base without using tools so that the unit can be more easily transported and compactly stored.

The handheld controller features simple push buttons for raising and lowering the lifter as well as opening / closing the base legs.

Comes standard with 2-point yoke spreader bar with quick release clips. It also offers the option of a pivot frame for enhanced patient positioning during lifting.

Optional Pivot Frame

- 3 height settings
- tool-less adjustment
- Quick release hook system
- Electrically operated base
- Handheld controller
- Emergency stop
- Manual emergency lowering
- Optional Pivot Frame
- Compatible with range of slings

61.5cm	109cm	101cm	43 - 181cm (3 height settings)	12.5cm	35.3kg	Lifter Actuator: 2 years Battery - 1 year	180kg

Novis LiftAid 320 Hoist

The LiftAid 320 is a heavy duty mobile lifter most suitable for professional care and rehabilitation settings. The armrests assist with gait training and toileting, but can be easily folded down to maximise lifting space or ensure compact storage when not needed.

The mast can also be easily removed from the base without the need to use tools to allow for more compact storage.

For patients who can support some of their own weight, the gait training vest can be used during mobility training or hygiene routines.

The three height settings make it possible to accommodate lifting and transfers from the floor, chair or bed. The electronic handheld controller is used to adjust the lift height as well as the leg spread.

- Heavy duty, full feature lifter
- Fold down armrests
- Suitable for gait training
- U-shaped base for enhanced stability
- Electronic handheld controller for height adjustment and leg spread
- Full range of compatible slings
- Quick release spreader bar attachment

INVACARE ISA Stand Assist

The ISA stand assist lifter is designed to support transfers for people with some weight bearing ability but who are unable to stand unaided. The intuitive design enables family members and carers to easily affect an efficient lift, while the flexible adjustments allow for adaptation to the needs of a wider range of body types without compromising on the ergonomic function.

New ergonomic design features, such as more naturally shaped hand grips assist those with limited dexterity while the wide range of settings for the lower leg support comfortably accommodates many different leg lengths. The extendable lifting arm can easily be set according to the body shape and height required and this makes the ISA a practical choice for Community or Residential Care settings where it may be used for multiple people.

- Flexible adjustments
- Adapts to wide range of body types
- Ergonomic design for user and carer
- Easily dismantled without tools
- Ergonomic push bar shape
- Anti-slip foot pedal

- Curved legs for easy manoeuvring around chairs and toilet bases
- Flexible secure sling hooks
- Two stand assist sling options
- Leg band option for improved stability
- Footplates for shorter or taller individuals

Specially shaped curved hand grips position the hands in a natural way and use comfortable soft touch material.

Extendable lifting arm with nine length positions uses an easy access lever with self-locking mechanism for a fast and secure lift.

Lower leg support allows one handed tool-free height adjustment with six positions. Maintains the lower legs comfortably.

	Base Width	Base Length	Max Leg Spread	Castor Size (Front Rear)	Lifting Range	Product Weight	Warranty	S.W.L.

STANDING AID Mobi Pro Flexi

The Mobi Pro Flexi is an ergonomic and compact mobile assistive mobility device ideal for people with low leg strength and some trunk balance who experience difficulty walking.

With its rotating padded seats and knee support, the Mobi Pro Flexi is an excellent substitute for a wheelchair and its small turning radius makes it ideal for smaller spaces.

It is equipped with a manual leg spread mechanism, ensuring it can be adapted to work with most seating and it can safely be used in a moisture area such as a toilet. The Mobi Pro Flexi features rear castor brakes for added security and is virtually maintenance free.

- Encourages patient mobility and independence
- Easy transfer to and from a toilet area
- Accommodates most seating types
- Allows eye contact between caregiver and patient
- Minimizes manual handling by caregiver thus increasing caregiver safety

With the seats rotated upwards, bring the Mobi Pro Flexi towards the patient. The legs can be adjusted depending on the transfer. Engage the brake.

The patient rests their feet on the footplate and firmly grasps the handles to raise themselves. Swivel the seat pads into position so the patient can sit and then proceed with transfer.

NO-LIFT TRANSFER Convertible Chair

What if one carer could safely transfer even a bariatric, non-ambulant patient all by themselves, without the risk of injury and still ensure patient safety and dignity? Using a hoist to transfer a patient out of bed can be challenging. Some patients feel insecure or find being lifted painful. Fitting a sling can be awkward and often you need two carers to effect a safe transfer but there isn't sufficient help available.

These can all be factors that contribute to limited early patient mobilization, increased work-related injuries and reduced patient wellbeing.

This range of convertible transfer chairs make it possible for a carer to single-handedly transfer a patient out of bed safely and comfortably using the Patient Transfer System to effect a supine lateral transfer. It's then just a matter of easily returning the chair to a seated position to transport the patient to in-house ancillary services or allow them to engage more fully in family or community activities.

1 Place the chair by bed in stretcher position.

2 Attach bed sheet to transfer bar.

3 Transfer patient by turning handle.

4 Incline chair and you're ready to go!

The combined recline and tilt-in-space functions are designed to assist pressure relief and facilitate positioning without affecting the body angle of the patient.

The caregiver can frequently reposition a patient to increase sitting tolerance and even effect trendelenburg tilt if necessary.
