

DYNA-TEK® Pad Cushion

At Risk Category

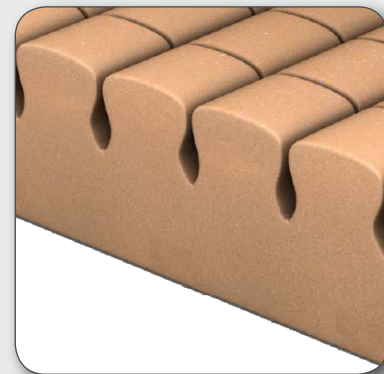

The Dyna-Tek® Pad Cushion has been created for users considered to be “At Risk” of pressure ulcer development.

The specialist “castellated cut” CMHR foam surface ensures the reduction of heat and moisture build up while achieving maximum pressure re-distribution.

The vapour permeable cover is multi-stretch with a non-slip base. An economical product choice, ideal for use in a wheelchair, hospitals or homecare environment.

- Tear duct cut - CMHR castellated foam
- Multi-stretch vapour permeable fabric
- Fabric impregnated with anti-fungal agent
- Welded cover option prevents fluid ingress and aids decontamination processes
- Launderable up to 95°C
- Non slip base prevents slippage, encouraging patient safety
- Sag compensator available - suitable for wheelchair users
