

STERRI-MATT® Foam Cleaner

Sterri-Matt is a unique foaming surface sanitiser developed originally as an efficient, effective solution for cleaning and disinfecting hospital and health care mattresses. Sterri-Matt is fast drying, non-corrosive and non-destructive and works on most soft or hard surfaces.

It will not delaminate or damage expensive assets and dries rapidly, reducing the time taken to clean and sanitise.

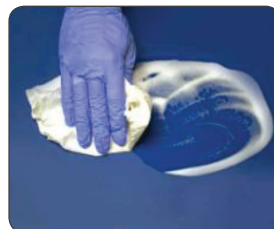

The foam is applied directly to the surface, rubbed in with a cloth or paper towel to effectively deep clean, remove stains, deodorise and kill 99.999% of germs, acting

simultaneously as a detergent and disinfectant. Sterri-Matt doesn't damage two way stretch material (dartex, etc.) and many mattress suppliers now recommend avoiding using disinfectant wipes due to the damage they cause to the mattress cover material.

- Easy foam application
- Wipe on, wipe off - No dilution required
- No harmful solvents or chemicals
- Fresh pleasant fragrance
- Fast drying
- Non-corrosive, non-destructive
- Can be used on hands, all surfaces and all ward based equipment
- Suitable for use in hospitals, aged care and medical facilities

Apply foam direct onto mattress. Wipe with cloth all over mattress.

Remove any matter or stains.

Mattress dries rapidly: clean, deodorised and ready for patient.
